

Protect your wet sump engine with a **Power Flo™ Remote Bypass System**

by **RACELINE™**

The internal bypass mechanism utilized in Raceline's dry sump pumps has been incorporated into a remote bypass unit. To obtain lower oil temperatures and control of your oil pressure, simply disable the stock bypass and install a Power Flo™ Remote Bypass unit in the pressure line, after the cooler and filter. Experience the RACELINE advantage with the Power Flo™ Remote Bypass System.

Available with Size -10 or -12 Fittings

- Cooler oil and engine running temperatures and less oil aeration.
- Adjust oil pressure instantly.
- Lightweight Billet Aluminum for maximum strength to weight ratio.
- Anodized high performance finish.
- Quality inspected throughout.
